

About Us

DIGITALEUROPE is the **leading trade association** representing **digitally transforming industries** in Europe. We stand for a regulatory environment that enables businesses to grow and citizens to prosper from the use of digital technologies. We wish Europe to develop, attract and sustain world's **best digital talents and technology companies**.

Our Vision

A European Union that nurtures and supports digitally transforming industries. Europe will **prosper** from the **jobs** we provide, the **innovation** and **economic benefits** we deliver, and the **societal challenges** we address.

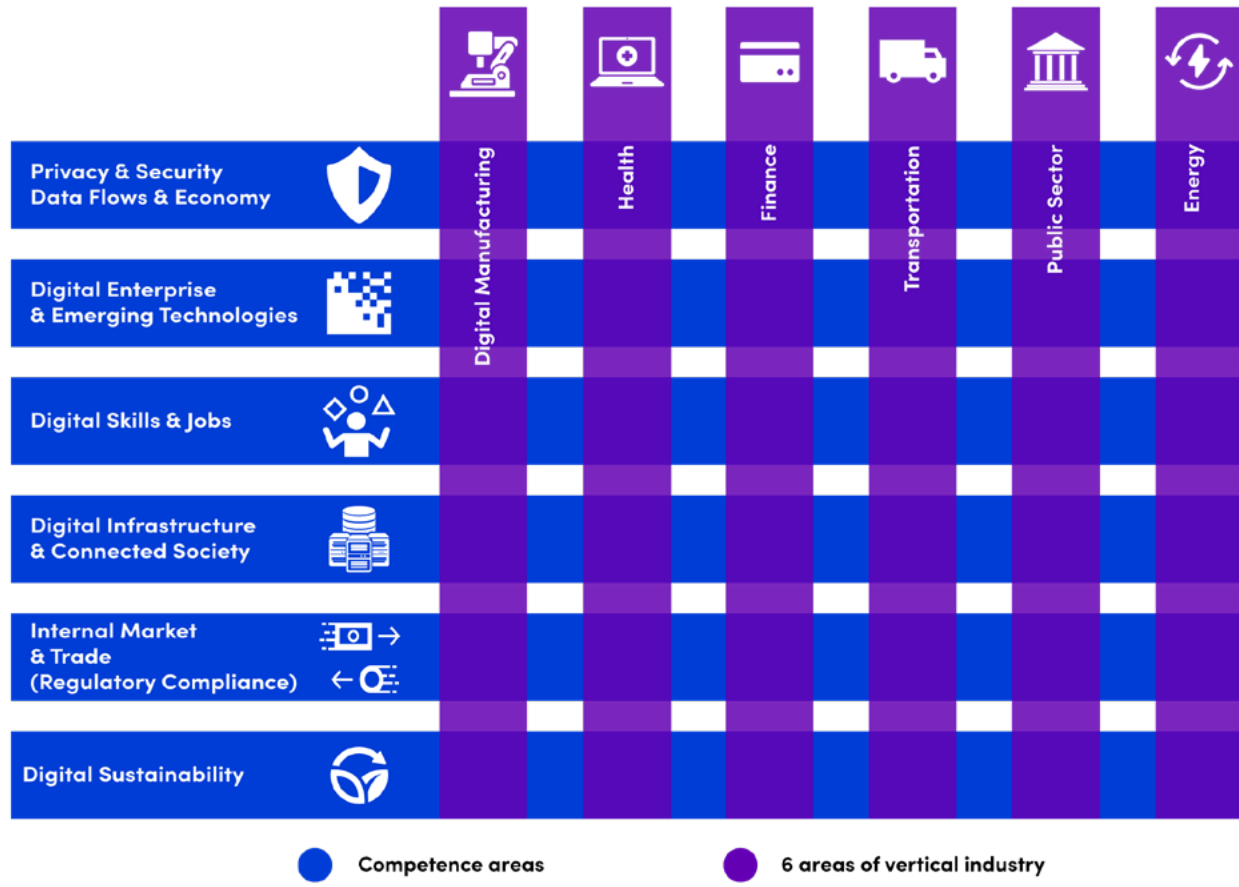

Our Mission

To shape, on behalf of our members, a business, **policy and regulatory environment** in Europe that best realises our vision.

We achieve this by working as a **dynamic and trustworthy partner** with the European Institutions, other European and global bodies and, through our national trade associations, the **EU Member States**.

We take stock of digital transformation

“Digital” goes far beyond the digital technology industry. It **impacts all industries and transforms society**. With a team of over twenty experts, DIGITALEUROPE is one of the largest and most agile trade associations in Brussels. Our team **takes stock of the ongoing digital transformation** and provides support to our members by coordinating policy work **across all digital policy issues**: from cybersecurity to eco-design, including AI, eHealth and digital manufacturing.

We are present where it matters

We value the engagement of our members in all internal and external activities. We are directly involved in a series of **strategic high-level groups**, such as the European Commission’s High-Level Expert Group on Artificial Intelligence, the European Commission’s Industrial Forum and the Board of the European Internet Forum. We have led the **Digital Skills & Jobs Coalition** since 2016.

We are a trusted partner

DIGITALEUROPE has been strategically positioned in Brussels **for over 20 years**. We are recognised as a strong partner and a **constructive interlocutor to the European institutions**. We gather all relevant decision-makers from industry and government via our workshops, events and projects to help harness the value of digitalisation in Europe. We are committed to **high ethical standards** in our dealings with public officials.

We make a positive impact

DIGITALEUROPE’s advocacy work helps support the right **policy-making to nurture innovation**, advance **digitalisation**, drive **growth**, raise **employment** in Europe as well as strengthen its **global competitiveness**. In addition, we have been actively collaborating with European institutions through the management of over **20 pan-European projects** in the last decade.
